**Subject:** Presentation; Science under Assault, Wed, Feb 6, 11am

**Science Under Assault**

Wednesday, February 6, 11 00, Legislative Building auditorium (third floor) in Raleigh.

This presentation is about how Science is being subtly but successfully undermined across the board, from our education system to the media — *yet almost no one realizes the magnitude of what is going on.* This has *profoundly* adverse consequences to the state's economy, as well as on the freedoms of its citizens.

The free 45 minute slideshow will be followed by a Q&A. NC's policies on all of these technical matters should be based on genuine scientific assessments. However, that is ordinarily not the case, as real Science has been under siege by lobbyists with self-serving economic or political agendas.

Open to the public

John Droz, Jr.
